- Report...to Congress...

Robert J Dole Courthouse

“Clean Energy”

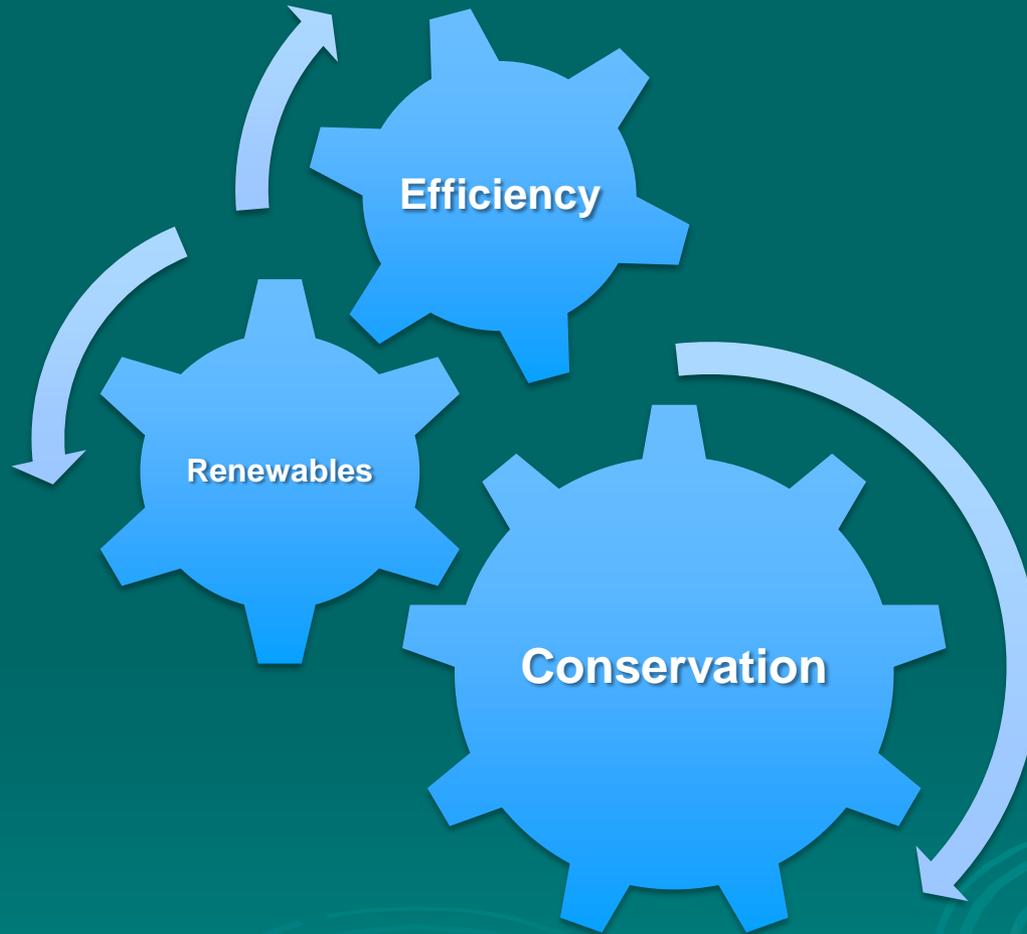

Conservation = cheapest form of Clean Energy Proj

(higher and lower Temp setpts, power strips, personal responsibility, behavior mod....)

Efficiency = second cheapest form of Clean Energy

(ABL – 39 things that you can do to a motor to make it 98% efficient, piping arrangements, WHITE ROOFS, insulation, glass, lighting....)

“Clean Energy”

Clean Energy and ZEF

Adjust the BTU/sf/yr

To – $\text{BTU/Person/sf/deliverable/yr}$
