

Webinar Title: *Get Flexible - Low Cost Compliance Solutions for Small Wastewater Treatment Systems*

Note: This webinar will be a Webcast and attendees can only connect to audio via VoIP (Computer audio).

Date: Thursday, March 25, 2021 (1-2:30pm EST)

Presenter: Jon van Dommelen, Ohio EPA, Compliance Assistance Unit

Registration: <https://attendee.gotowebinar.com/register/5546672636105375248>

Audience: Wastewater Treatment Plant Owners and Operators, Municipal leaders (Mayors, Council Members, Directors of Public Works, etc). While all plant owners and operators may find this useful, it is geared more toward smaller systems with flow of less than 1 million gallons per day. Others who will find this informative include: Clean Water Act National Pollutant Discharge Elimination System (NPDES) technical assistance providers, permit writers and compliance staff from states, tribes, and US EPA.

Description: Small treatment systems are difficult to operate. They often suffer from a wide range of influent flows – from few operational controls to a lack of time to perform effective process control. From over 20 years of troubleshooting treatment plant noncompliance, Jon van Dommelen will present generally inexpensive examples of solutions that can make a small mechanical system treat what comes down the pipe and result in better quality effluent. Topics will include solving some of the following issues: effluent suspended solids, effluent ammonia, poor flow splitting, high influent flow, wasting, disinfection, as well as cheap, easy and effective process control suggestions.

Certificate of Attendance: Registered attendees receive a follow-up email from GoToWebinar 24 hours after the conclusion of the webinar including a link to download a certificate of attendance. Check your inbox or spam folder for this email. Discuss eligibility of continuing education credits with your state's specific certification authority.

Accommodations: A StreamText link for live captioning will be available.

More information: A website with past webinar series recordings is under development. Certificates are *not* issued for viewing past webinar recordings.

Sponsors: US EPA's Office of Compliance and the US EPA-Authorized State Reducing SNC with NPDES Permits National Compliance Initiative (NCI) Workgroup.

Contacts: Peter Babor, babor.peter@epa.gov and Laura Paradise, paradise.laura@epa.gov

Webinar Promotion: *Webinar promotional emails are sent to:* EPA and state (by EPA Regions) NPDES compliance/enforcement program staff, Pretreatment Coordinators, attendees registered for prior webinars and the Fed/State SNC NCI Workgroup – who will forward to systems in noncompliance. The Association of Clean Water Administrators (ACWA), National Rural Water Association and Rural Community Assistance Partnership will distribute webinar information to their association members.
